INTRODUCTION

The tribe Euopsini is a monophyletic group distributed in the Old World. This is the most primitive tribe of the supertribe Attelabidae [Legalov, 2005]. 42 species from 11 genera are present in the fauna of China [Legalov, 2003, 2007; Legalov, Liu, 2005; Liang, Li, 2005; Li, Li, Li, 2008]. New data on the distribution of Chinese Euopsini are listed here.

MATERIAL AND METHODS

Specimens are stored in the following museums: IZAS – Institute of Zoology, Academia Sinica (China: Beijing) and SZMN – Siberian Zoological Museum, Institute of Animal Systematics and Ecology (Russia: Novosibirsk).
